

The weekly Coronavirus (COVID-19) surveillance report for Wirral

Week ending: Friday 6th August 2021

cumulative data from:

30 January 2020 to 6 August 2021 in **WIRRAL** (unless otherwise stated)

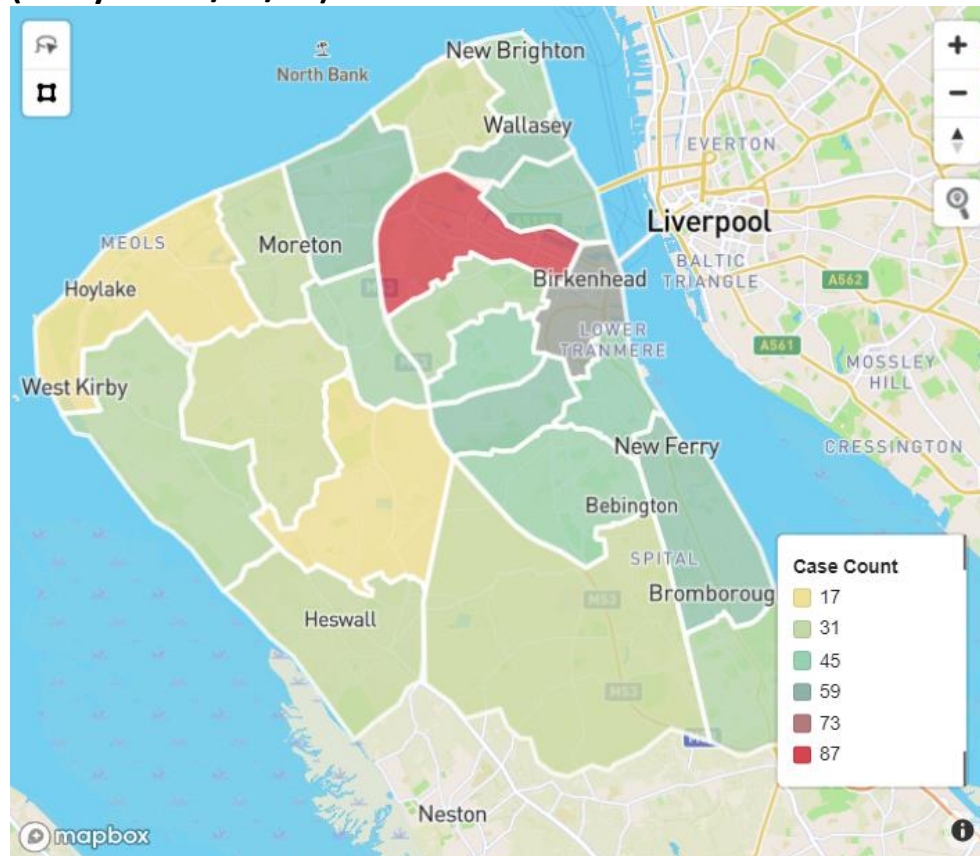

cumulative number of COVID-19 cases (Pillar 1 +2)	proportion of eligible people receiving 1 vaccine dose to 10 th August	cumulative tests per 100K population (Pillar 2 only)	cumulative number of registered COVID-19 deaths to 30 th July
33,855	81.5%	404,532	981
number of COVID-19 cases this week (Pillar 1 +2)	proportion of eligible people receiving 2 vaccine doses to 10 th August	tests per 100K population this week (Pillar 2 only)	number of COVID-19 deaths registered this week (to 30 th July)
888	71.7%	8,504	5

LATEST 7-DAY POSITIVITY OF COVID-19 TESTS (to 5th August)

7.6%

7-DAY CONFIRMED COVID-19 INFECTION RATES¹

Confirmed Cases by Wirral Ward (7-days to 06/08/21)

Wirral	273.1/100,000 infection rate ¹
Merseyside	325.4/100,000 infection rate ¹
North-West	290.5/100,000 infection rate ¹
England	294.2/100,000 infection rate ¹
National Rank	77th ²
Previous Week Rank	60th ²

¹infection (incidence) rate - the cumulative number of confirmed cases of COVID-19 for the 7-day period divided by the total population of each area multiplied by 100,000

²A rank of the rate of COVID-19 per 100,000 by local authority. There are 309 local authorities in England (as at 14/04/21). A decrease in rank does not necessarily mean our rate is decreasing, rather, other areas rates could be increasing at a greater speed.

The weekly Coronavirus (COVID-19) surveillance report for Wirral

Week ending: Friday 6th August 2021

CONFIRMED COVID-19 CASES BY AGE AND GENDER

⁴median age is the middle value in a range - half of the cases are younger than this age and half are older (all persons)

Note: Some case records do not currently have full age and/or gender details and are therefore not included in the above chart; therefore, figures will not sum to headline totals

ETHNICITY OF CONFIRMED COVID-19 CASES

ETHNICITY OF COVID-19 DEATHS

Note: These data sets are analysed using the cumulative confirmed cases and COVID-19 related deaths in Wirral

COVID-19 RELATED MORTALITY

cumulative number of COVID-19 related deaths in Wirral

Note: The above data has followed the methodology of the PHE indicator for 'Deaths within 28 days of a positive COVID-19 test' since reporting for week ending 30th October and is therefore not comparable to reports prior to that week. The figures are still derived using a local live data source and so will therefore not exactly match the number of deaths officially reported by the Office for National Statistics or the PHE Coronavirus Tracker. Further validation of the external data sources with fully coded dates has now led to changes in the numbers reported. Some records do not currently have full age and/or gender details and are therefore not included in the above chart; therefore, figures will not sum to headline totals. Cases are subject to retrospective review and may be reallocated to other Local Authorities.

The weekly Coronavirus (COVID-19) surveillance report for Wirral

Week ending: Friday 6th August 2021

EPIDEMIC CURVE

number of positive cases by Pillar 1 and Pillar 2 testing⁵

⁵The most recent week is a partial week and only data from more than five days ago can be considered complete

The data are shown by the date the specimen was taken

Pillar 1 data is for swab testing in PHE labs and NHS hospitals for those with a clinical need as well as staff

Pillar 2 data is for swab testing for the wider population, as set out in government guidance

LFT (lateral flow device) data is for rapid tests in the community (which also make up part of Pillar 2 testing)

Details around the government roadmap can be found here: <https://www.gov.uk/government/publications/covid-19-response-spring-2021/covid-19-response-spring-2021-summary>

HOSPITALISED COVID-19 CASES

Number of beds occupied by confirmed COVID-19 patients by bed type (Wirral University Teaching Hospital (WUTH) NHS Foundation Trust)

Note: The peak of WUTH beds occupied by patients with COVID-19 is 279 (January 2021). This surpassed the previous peak of 131 (April 2020)
