The weekly Coronavirus (COVID-19) surveillance report for Wirral

Week ending: Friday 17th September 2021

cumulative data from: 30 January 2020 to 17 September 2021 in WIRRAL (unless otherwise stated) proportion of eligible people receiving 1 vaccine dose to cumulative number of registered COVID-19 deaths cumulative number of COVID-19 cases (Pillar 1 +2) 468,562 39,696 proportion of eligible people receiving 2 vaccine doses to 21st September number of COVID-19 deaths registered this week (to tests per 100K population this week (Pillar 2 only) number of COVID-19 cases this week (Pillar 1 +2) 10th September) 10,813 833 78.4% LATEST 7-DAY POSITIVITY OF COVID-19 TESTS (to 16th September) 7-DAY CONFIRMED COVID-19

¹infection (incidence) rate - the cumulative number of confirmed cases of COVID-19 for the 7-day period divided by the total population of each area multiplied by 100,000
²A rank of the rate of COVID-19 per 100,000 by local authority. There are 309 local authorities in England (as at 14/04/21). A decrease in rank does not necessarily mean our rate is decreasing, rather, other areas rates could be increasing at a greater speed.

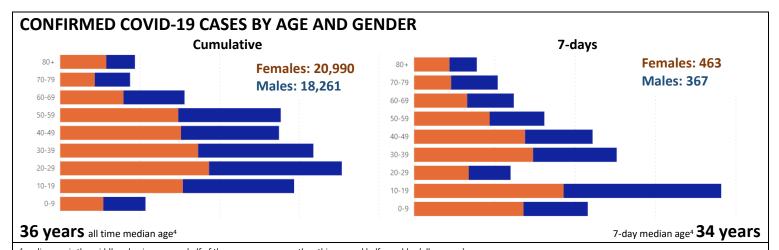

For more information, including ward figures, see <u>Daily COVID-19 reports</u>

Note:

Rates are now being calculated using population estimates for 2020 (ONS) and, though the impact is negligible, figures are not retrospectively comparable prior to report for week ending 13th
August 2021. Headline number of positive cases figures sourced from NHS Coronavirus Tracker; cumulative total is subject to retrospective addition which can mean it increases by more than the weekly total

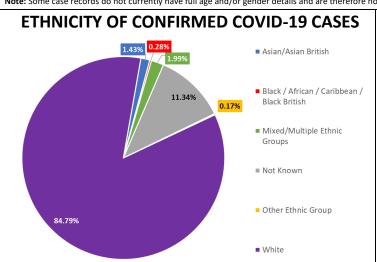

The weekly Coronavirus (COVID-19) surveillance report for Wirral

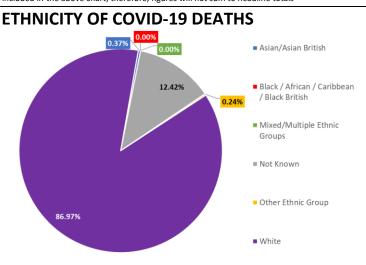

Week ending: Friday 17th September 2021

4median age is the middle value in a range - half of the cases are younger than this age and half are older (all persons)

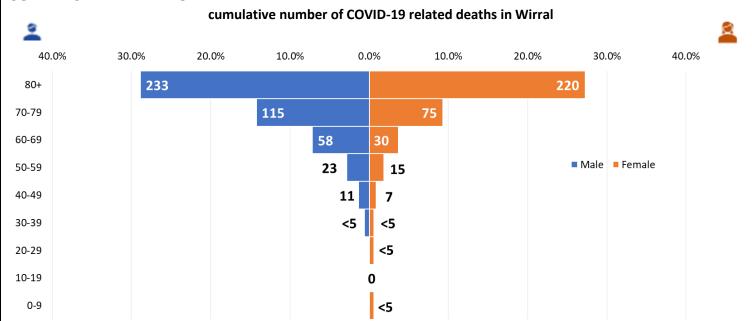

Note: Some case records do not currently have full age and/or gender details and are therefore not included in the above chart; therefore, figures will not sum to headline totals

 $\textbf{Note:} \ \text{These data sets are analysed using the cumulative confirmed cases and COVID-19 related deaths in Wirral and COVID-19 related deaths of the cumulative confirmed cases and COVID-19 related deaths of the cumulative confirmed cases and COVID-19 related deaths of the cumulative confirmed cases and COVID-19 related deaths of the cumulative confirmed cases and COVID-19 related deaths of the cumulative confirmed cases and COVID-19 related deaths of the cumulative confirmed cases and COVID-19 related deaths of the cumulative confirmed cases and COVID-19 related deaths of the cumulative confirmed cases and COVID-19 related deaths of the cumulative confirmed cases and COVID-19 related deaths of the cumulative confirmed cases and covid cases are confirmed cases. The covid case is the cumulative confirmed cases and covid case is the covid case of the case of the case of the covid case of the case of the covid case of the case of the$

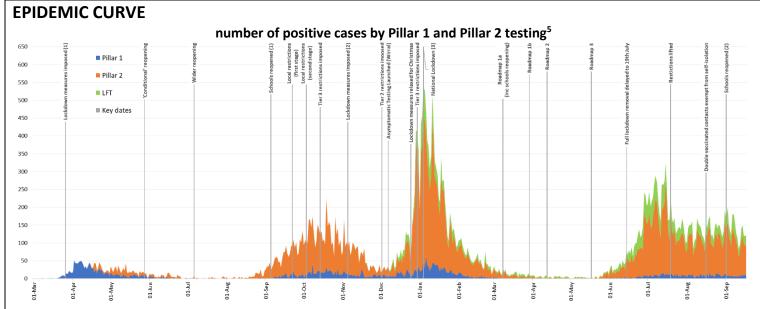

COVID-19 RELATED MORTALITY

Note: The above data has followed the methodology of the PHE indicator for 'Deaths within 28 days of a positive COVID-19 test' since reporting for week ending 30th October and is therefore not comparable to reports prior to that week. The figures are still derived using a local live data source and so will therefore not exactly match the number of deaths officially reported by the Office for National Statistics or the PHE Coronavirus Tracker. Further validation of the external data sources with fully coded dates has now led to changes in the numbers reported. Some records do not currently have full age and/or gender details and are therefore not included in the above chart; therefore, figures will not sum to headline totals. Cases are subject to retrospective review and may be reallocated to other Local Authorities.

The weekly Coronavirus (COVID-19) surveillance report for Wirral

Week ending: Friday 17th September 2021

⁵The most recent week is a partial week and only data from more than five days ago can be considered complete

The data are shown by the date the specimen was taken

Pillar 1 data is for swab testing in PHE labs and NHS hospitals for those with a clinical need as well as staff

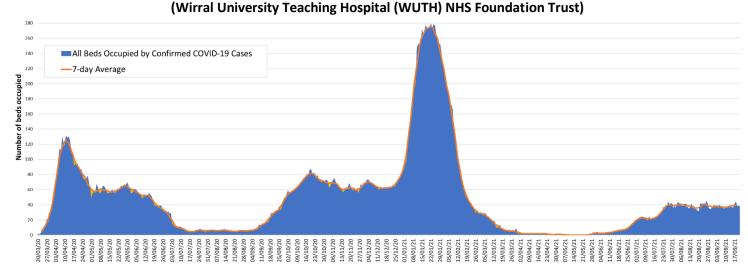

Pillar 2 data is for swab testing for the wider population, as set out in government guidance

LFT (lateral flow device) data is for rapid tests in the community (which also make up part of Pillar 2 testing)

 $Details around the government roadmap can be found here: \\ \underline{https://www.gov.uk/government/publications/covid-19-response-spring-2021/covid-19-response-spring-2021-summary}$

HOSPITALISED COVID-19 CASES

Number of beds occupied by confirmed COVID-19 patients by bed type (Wirral University Teaching Hospital (WUTH) NHS Foundation Trust)

Note: The peak of WUTH beds occupied by patients with COVID-19 is 279 (January 2021). This surpassed the previous peak of 131 (April 2020)
