

The weekly Coronavirus (COVID-19) surveillance report for Wirral

Week ending: Friday 29th January 2021

cumulative data from:

30 January 2020 to 29 January 2021 in WIRRAL

cumulative number of COVID-19 cases (Pillar 1+2)	cumulative tests per 100K population	cumulative number of registered COVID-19 deaths to 22 nd January
21,906	108,545	732
number of COVID-19 cases this week (Pillar 1+2)	tests per 100K population this week	number of COVID-19 deaths registered this week (ending 22 nd January)
950	8,252	70

7-DAY POSITIVITY OF COVID-19 TESTS

10.7%

7-DAY CONFIRMED COVID-19 INFECTION RATES¹

Confirmed Cases by Wirral Ward (7-days to 29/01/21)

Ward	Latest week (number of cases)	Direction from Previous Week	Rate per 100,000
Upton	71	Decrease ▼	420.9
Birkenhead & Tranmere	71	Decrease ▼	425.0
Cloughton	66	Decrease ▼	456.8
Liscard	65	Decrease ▼	403.3
Leasowe & Moreton East	56	Decrease ▼	374.5
Seacombe	55	Decrease ▼	356.0
Prenton	55	Decrease ▼	372.4
Bidston & St. James	50	Decrease ▼	309.3
New Brighton	46	Decrease ▼	304.0
Rock Ferry	45	Decrease ▼	306.9
Moreton West & Saughall Massie	44	Decrease ▼	312.3
Clatterbridge	41	Decrease ▼	289.1
Eastham	39	Decrease ▼	275.8
Oxton	35	Decrease ▼	251.8
Bromborough	34	Decrease ▼	209.7
Wallasey	33	Decrease ▼	224.7
Bebington	33	Decrease ▼	210.1
Heswall	25	Decrease ▼	191.1
Greasby, Frankby & Irby	24	Decrease ▼	175.2
Hoylake & Meols	21	Decrease ▼	157.6
Pensby & Thingwall	18	Decrease ▼	137.7
West Kirby & Thurstaston	17	Decrease ▼	134.5

*Note: Numbers of cases are incomplete and subject to variability due to delays in uploading cases data into the SGSS reporting system. This means the numbers of confirmed cases may not be directly comparable with previous reports.

Wirral	293.2/100,000 infection rate ¹
Merseyside	383.9/100,000 infection rate ¹
North West	297.7/100,000 infection rate ¹
England	265.8/100,000 infection rate ¹
National Rank	83rd ²
Previous Week's Rank	42nd ²

¹infection (incidence) rate - the cumulative number of confirmed cases of COVID-19 for the 7-day period divided by the total population of each area multiplied by 100,000

²A rank of the rate of COVID-19 per 100,000 by local authority. There are 343 local authorities in England. A decrease in rank does not necessarily mean our rate is decreasing, rather, other areas rates are increasing at a greater speed.

The weekly Coronavirus (COVID-19) surveillance report for Wirral

Week ending: Friday 29th January 2021

CONFIRMED COVID-19 CASES BY AGE AND GENDER

43 years all time median age⁴

7-day median age⁴ **42 years**

⁴median age is the middle value in a range - half of the cases are younger than this age and half are older (all persons)

Note: Some case records do not currently have full age and/or gender details and are therefore not included in the above chart; therefore, figures will not sum to headline totals

ETHNICITY OF CONFIRMED COVID-19 CASES

ETHNICITY OF COVID-19 DEATHS

Note: These data sets are analysed using the cumulative confirmed cases and COVID-19 related deaths in Wirral

COVID-19 RELATED MORTALITY

cumulative number of COVID-19 related deaths in Wirral

Note: The above data has followed the methodology of the PHE indicator for 'Deaths within 28 days of a positive COVID-19 test' since reporting for week ending 30th October and is therefore not comparable to reports prior to that week. The figures are still derived using a local live data source and so will therefore not exactly match the number of deaths officially reported by the Office for National Statistics or the PHE Coronavirus Tracker. Further validation of the external data sources with fully coded dates has now led to changes in the numbers reported.

The weekly Coronavirus (COVID-19) surveillance report for Wirral

Week ending: Friday 29th January 2021

EPIDEMIC CURVE

number of positive cases by Pillar 1 and Pillar 2 testing⁵

⁵The most recent week is a partial week and only data from more than five days ago can be considered complete

The data are shown by the date the specimen was taken

To allow data to be seen accurately, the chart only shows data from 1st August (shortly after original lockdown measures were removed (6 July 2020)); this includes the peak of the second wave (October 2020)

Pillar 1 data is for swab testing in PHE labs and NHS hospitals for those with a clinical need as well as staff

Pillar 2 data is for swab testing for the wider population, as set out in government guidance

HOSPITALISED COVID-19 CASES

Number of beds occupied by confirmed COVID-19 patients by bed type (Wirral University Teaching Hospital NHS Foundation Trust)

Note: The peak date for hospital occupancy was in April 2020 with 131 confirmed COVID-19 patients in beds (peak number of ICU beds occupied by COVID-19 patients was 9 in the 'first wave', which was initially surpassed on 7th November (n=10)). The current peak number of ICU beds (n=19) was recorded on 28th January 2021. It should also be noted that the ITU/HDU beds (orange) are a subset of 'any acute beds' (blue), e.g. on 3rd January 2021 there were 100 beds occupied by COVID-19 confirmed patients, 6 of these were in ITU/HDU beds.
